Australian Renewable
Energy Agency

Knowledge Sharing at ARENA

Here at ARENA, we advance renewable energy by funding innovative projects and sharing insights to accelerate Australia's net zero transition.

By capturing and sharing insights from funded projects, we accelerate innovation, reduce risks, and support Australia's transition to renewable energy.

Knowledge is ARENA's return on investment. Each ARENA-Funded project has an important role to play in sharing insights from their project in a timely, factual and compelling way.

We aim to capture high-quality knowledge that:

- > Aligns with market needs
- > Respects Intellectual Property (IP) and commercial rights
- > Targets an informed energy sector

To do this we ask recipients to:

- > Share timely and critical insights
- > Substantiate claims with evidence
- > Report on successes as well as challenges
- > Avoid marketing material
- > Use clear communication

Need support? We're Here to Help!

ARENA's Knowledge Sharing team is here to support you at every stage of your application and project. We can help you:

Develop a strong
Knowledge Sharing
Plan

Identify key industry
knowledge gaps

Understand your
Knowledge Sharing
requirements

Access valuable
resources

Receive early
feedback on drafts

If you have any questions, the [ARENA Grantee Toolbox](#) is full of helpful resources. If you need more detail, or you'd like to arrange a briefing with the Knowledge Sharing team, reach out to your knowledge sharing officer or send us an email.

knowledge@arena.gov.au

What is a Knowledge Sharing Plan?

As part of your ARENA application, you are required to submit a proposed Knowledge Sharing Plan (KSP), which will form the basis of the knowledge sharing deliverables in the funding agreement. This document outlines how your project will share insights, lessons learned, and outcomes with key stakeholders.

Your KSP must be:

✓ Targeted

Identify key audiences who will benefit from your project's insights.

✓ Practical

Focus on sharing knowledge that is actionable and relevant to industry challenges.

✓ Timely

Plan for when the knowledge will be the most relevant and impactful.

✓ Accessible

Ensure findings are shared in formats that stakeholders can easily understand and use.

A well-structured KSP helps maximise the impact of ARENA's funding by ensuring knowledge is accessible and useful to others working in the sector.

Your commitment

Knowledge is ARENA's return on investment. To receive ARENA funding, Recipients must fulfill **knowledge sharing deliverables** at various stages of the project. These deliverables vary based on project type and may be **one-off or recurring**, tied to **specific milestones or dates**.

We remain aware of the rapidly evolving nature of the industry, and work with you to ensure that the content is both relevant and timely.

Frequently Asked Questions

What is ARENA doing with commercially sensitive data?

Sensitive data is collected and processed in an aggregated format to support portfolio analysis. All data by ARENA is stored in secure Australian data centers.

How detailed should my KSP be?

It should be clear, practical, and outline key lessons, target audiences, and estimated timeframes for delivery.

When should knowledge be shared?

At critical points - such as project setup, mid-project updates, and completion - when it's most relevant and impactful.

Confidentiality Concerns?

Knowledge sharing does not require you to **compromise commercially sensitive information or IP rights**.

ARENA's requirements focus on sharing industry-relevant insights and lessons learnt, while respecting your business's proprietary interests.

If you're still unsure about what is required, please reach out to the Knowledge Sharing team for a discussion.

Knowledge Sharing deliverables

As part of your Knowledge Sharing Plan, you are expected to deliver key activities and reports to capture and share insights from your project.

Below is an overview of the most common knowledge sharing deliverables; however, we encourage recipients to bring their own ideas.

Remember to always make use of ARENA's [Report Writing Guidelines](#) for Public Reports

Confidential, or as agreed with ARENA

Quantitative data

This may include financial models and project performance metrics. A consistent dataset across ARENA's projects enables portfolio-wide analysis. Most required data is already collected by projects or publicly available with best-practice monitoring.

Events summary and participation in ARENA / Industry-led events

Presentations or engagement in industry / ARENA events enhance project exposure and knowledge sharing. An Events Summary capturing knowledge from these events, as well as plans for future events, must be provided to ARENA at each Milestone.

[Event summary template](#)

Site visit(s)

One or multiple site visits provide on-ground experience and demonstration of the facility. The site visit can be open to ARENA staff only or to a broader group of stakeholders.

15-Minute Surveys

Quarterly surveys which are quick to fill out and provide valuable updates and insight into project progress, learnings and status.

Shared publicly

Final Knowledge Sharing Report

A public Final Knowledge Sharing Report is required at project completion, summarising key findings, lessons learnt, future applications, and other agreed topics.

Report structure:

- > Cover page
- > Index of tables/figures (if applicable)
- > Executive summary (key points, conclusions, recommendations)
- > Introduction/background
- > Project insights/outcomes (with images and lists where appropriate)
- > Conclusion (key findings, industry implications, recommendations, next steps)
- > References/appendices (if needed)

Lessons Learnt Reports

Short reports (approx. 3-10 pages) submitted regularly, providing industry with concise and timely insights. These reports should include achievements, challenges, and solutions on technical, regulatory, financial, economic, and social aspects of the project.

Report structure:

- > Cover page
- > Project background
- > Executive summary (listing key lessons)
- > Detailed explanation of key learnings
- > Conclusion, next steps, and implications for industry

High quality report examples

The following reports, published on ARENA's [Knowledge Bank](#), exemplify best practices in knowledge sharing. They serve as valuable references to help understand ARENA's expectations for clarity, structure, and depth of analysis.

Portfolio	Example	What makes it great
Lessons Learnt Reports		
Transport	Amber - Automating EV Charging in line with Wholesale Pricing - Lessons Learnt Report	The report follows a consistent structure and utilises graphs and images to provide additional context to the reader.
Low Emissions Metals	Rio Tinto and Sumitomo - Yarwun Hydrogen Calcination Pilot Demonstration Program - Lessons Learnt Report	The report covers highly technical learnings that can inform project design.
Large Scale Integration	Neoen Blyth Battery Deployment Project - Lessons learnt report #2	Great report structure, especially in terms of providing linkages and updates on previous LLR reports.
Energy storage	RayGen - Solar Power Plant Two Phase 1 – Lessons Learnt Report	This report clearly presents the key lessons in the executive summary and has a headline under each lesson learnt to introduce it before going into the details.
Flexible Demand / DER	Project Symphony - Final Lessons Learnt Report - Australian Renewable Energy Agency (ARENA)	Excellent summary and exploration of all lessons learnt throughout a successful pilot program. Clearly and succinctly explores both positive and negative learnings and provides suggestions for improvement for all lessons.
Ultra Low Cost Solar	5B Maverick Solar PV Automated Assembly & Deployment – Lessons Learnt Report 4	Well-structured report, with a simple to follow structure of each of the lessons learnt. Provides summary context to each of the lessons, and clear implication on how the changes effects parts of the future projects.
Hydrogen	Hysata – High-Efficiency ‘Capillary-fed’ Electrolyser Pilot Project - Lessons Learnt Report 2 - Australian Renewable Energy Agency (ARENA)	Well-structured and provides a good level of analysis in a relatively short format. It provides practical advice that other electrolyser developers could benefit from.
General Industry	George-Weston-Foods—Feasibility-Study-into-Onsite-Thermal-Systems-Lessons-Learnt-Report-1.pdf	This report made a concerted effort to draw out the implications of its learnings for broader industry through developing a template professional development learning plan.
Bioenergy	Malabar Biomethane Injection Project Lessons Learnt Report 3	Clear summary of learnings in the executive summary

Final Knowledge Sharing Reports

Low Emissions Metals	Port Kembla Steelworks Renewables & Emissions Reduction Study	Clear assessment and comparison between different technologies.
Large Scale Integration	Hornsedale Power reserve expansion – final project report	This report has great structure, clearly linking the project outcomes to the objectives and explaining technical aspects in details
Energy Storage	Relectrify – Second-life battery trials – Final report	Great report with detailed analysis of technical performance and customer feedback
Flexible Demand / DER	SA Power Networks - Flexible Exports for Solar PV Trial - Final Report - Australian Renewable Energy Agency (ARENA)	Excellent report structure, with lessons and outcomes signposted well for specific stakeholder groups.
Ultra Low Cost Solar	5B Maverick Solar PV Automated Assembly & Deployment – Final Report	This report provides a good report structure, and easy to follow guide to the technology change throughout this project period.
General Industry	Renewable Energy for Process Heat Opportunity Study Final Report - Australian Renewable Energy Agency (ARENA)	Good visual representation of key outcomes / findings /lessons learnt in the executive summary
Bioenergy	Loganholme Wastewater Treatment Plant – Gasification Facility Demonstration – Final Knowledge Sharing Report	The conclusion provides an analysis of how the project objectives have been achieved.

Other Knowledge Sharing Reports

Transport	TGE – Depot of the Future Vehicle Electrification Project - Infrastructure Design Report - Australian Renewable Energy Agency (ARENA)	The report provides a clear overview of the project, supported by a well-organised structure. It effectively uses images and graphics throughout to maintain reader interest and engagement.
Low Emissions Metals	Calix Zero Emissions Steel Technology (ZESTY) pre-FEED / FEED Study – Interim report	Comprehensive analysis of results and clear outline of conclusions and next steps.
Large Scale Integration	Transgrid – Wallgrove Battery – Flagship Report	Great report writing which took into account, and explained conflicting interpretations from project participants
Energy Storage	Yadlamalka - Spencer Energy Vanadium Flow Battery - Commissioning Report	This report has a great flow, taking the reader through the journey to commissioning and connecting a first-of-a-kind battery
Flexible Demand / DER	DEIP Market Integration Trials Summary Report 2.0 - Australian Renewable Energy Agency (ARENA)	ARENA-commissioned report which synthesises learning, compares and contrasts a range of trials. Excellent use of illustrative visuals throughout.
Ultra Low Cost Solar	APVI - Silicon to Solar -	The Silicon to Solar report provides two

	<u>Foundations for Solar PV Manufacturing in Australia</u>	different reports; an overview report and a detailed report to provide in-depth information. Both reports contain great use of infographics to get across complicated data to all audiences.
General industry	<u>Building Upgrade Finance Program - Guide for Councils</u>	Clear step-by-step guide targeted to a very specific audience
Bioenergy	<u>Mount Piper Commercialisation LCA</u>	Provides a clear comparison between life cycle emissions associated with the fossil fuel and the bioenergy-based processes.
